

Awareness Campaign on Monsoon Diseases

Organized By: Department of Microbiology, Sree Narayana College, Alathur

Venue: Sree Narayana College, Alathur Campus

Date: 8/7/26

Target Participants: Students, Teaching Faculty, Non-Teaching Staff, and Campus Visitors

Objectives

- To create awareness about common monsoon-related diseases and their prevention.
- To encourage healthy hygiene practices and environmental sanitation.
- To promote student participation in community health awareness initiatives.
- To disseminate essential health information through creative visual communication.

Programme Report

The Internal Quality Assurance Cell (IQAC) of **Sree Narayana College, Alathur** organized an **Awareness Campaign on Monsoon Diseases** to educate the college community on the prevention and control of seasonal illnesses during the monsoon. As part of the campaign, students designed informative and visually appealing posters highlighting common monsoon diseases such as dengue, malaria, leptospirosis, chikungunya, and water-borne infections, along with their preventive measures.

The posters emphasized the importance of maintaining personal hygiene, eliminating stagnant water, consuming safe drinking water, seeking timely medical attention, and adopting proper sanitation practices. The student-created posters were displayed at strategic locations across the campus, including academic departments, corridors, the library, the administrative block, and other

common areas, ensuring maximum visibility and awareness among students, faculty, staff, and visitors.

The campaign successfully promoted health consciousness while encouraging students to actively

participate in public health education through creative expression. It also reinforced the institution's commitment to fostering social responsibility and preventive healthcare awareness within the campus community.

Learning Outcomes

- Increased awareness of common monsoon diseases and their preventive measures.
- Enhanced understanding of the importance of personal hygiene and environmental cleanliness.
- Improved student engagement in health promotion and awareness activities.
- Strengthened the culture of preventive healthcare and community responsibility on campus.
