Dr. Soumya M**

Programme schedule

Theme: Orientation programme for BSc Botany Honours
Students

Date: 23/09/2026

Time: 9.30 am

Venue: Room no.32

Report on orientation programme

The Department of Botany organised a Career Orientation Programme for Botany students on 23 September 2026, focusing on the FYUGP programme and the diverse career opportunities available after B.Sc. and M.Sc. Botany. Dr. R. Bindu, Head of the Department, warmly welcomed the students to the programme. The sessions were handled by Dr. R. Bindu and Dr. Soumya M. The programme aimed to create awareness among students about the wide range of career pathways available in Botany beyond conventional teaching, including opportunities in government services, higher education, research, private sectors, and entrepreneurship. The session covered opportunities through Kerala PSC, UPSC, Indian Forest Service, Botanical Survey of India, Forest and Wildlife Departments, research institutions, universities, and plantation and commodity boards such as the Coffee Board, Rubber Board and Tea Board. Opportunities in research, higher education, biodiversity conservation, taxonomy, ecology, environmental consultancy, nurseries, seed companies, biotechnology and other private-sector areas were also discussed. Students were encouraged to pursue higher studies, NET/JRF and Ph.D. for research and academic careers, while developing practical skills such as plant identification, herbarium preparation, field survey, GIS, data analysis and scientific writing. The programme emphasised the importance of regularly checking official recruitment notifications and planning career pathways according to individual interests and qualifications. The orientation helped students gain a broader understanding of the diverse professional opportunities available in Botany and motivated them to plan their academic and career development systematically.
